# Anti-Microbial

## Sanitizing Fogger

### 30 Day Surface Protection (Scientifically Proven)

CASSA 777 Formula is unlike conventional sanitizers that kill bacteria by poison, phenols, heavy metals or high alcohol content by performing whilst bound to applied surfaces, our 777 Enzymatic Formula utilizes a combined three-pronged Lysing reaction that terminates airborne and surface contamination at the same time retaining a anti-microbial nano-coating to protect surfaces. When dry the 777 Enzymatic Formula forms a protective nano-coating that resembles microscopic spikes that aggressively attack and break down the cell membrane walls causing the death of gram positive and gram negative bacteria and germs. Tested and Scientifically proven to remain active on surfaces for 30 Days.

### Air Conditioning & Heating Disinfecting

Microscopic bacteria and viruses have perfect conditions for breeding in vehicle air conditioning, heating systems and interiors. Airborne pollutants such as germs, bacteria, infectious disease, mold spores, mildew, viruses (including Coronavirus), pet residue and odors ride in your vehicle with you and your family on a daily basis. CASSA Vehicle Fogger is designed as a Air Conditioning Internal Vehicle Treatment that Kills 99.99% of Harmful Germs and Bacteria including Coronavirus (COVID-19) (Scientifically Proven) in your air-conditioning system. Simply follow the instructions on the Vehicle Fogger and run your air-conditioning unit during the Fogger Sanitation process.

#### SANITIZING & PROTECTANT ROOM FOGGER

- + CASSA 777 Room Sanitizing Fogger (100g) will disinfect and protect an estimated internal room area of 6-30m<sup>2</sup>.
- + Aerosol Room Fogger takes 3-4 minutes to fully release once the release nozzle is actuated.

An additional 45 minutes is recommended for the room environment to aerate prior to re-entry and use.

#### SANITIZING & PROTECTANT VEHICLE FOGGER

- + CASSA 777 Vehicle Sanitizing Fogger (100g) will disinfect and protect an estimated internal vehicle area of 6-30m<sup>2</sup>.
- + Aerosol Vehicle Fogger takes 3-4 minutes to fully release once the release nozzle is actuated.

An additional 45 minutes is recommended for the vehicle environment to aerate prior to re-entry and use.

CASSA 777 FORMULA

When CASSA's 777 Enzymatic Formula comes into contact with COVID-19 it targets, engulfs and absorbs the virus destroying its protein cell wall - killing it. Our 777 Formula has been scientifically proven to kill Coronavirus.

### PRODUCT BENEFITS

- + Time Efficient & Cost Effective Disinfection Solution
- + Full Release Sanitizing Fogger & Protectant
- + Sanitize Entire Rooms & Vehicles with a Single Press
- + Advanced 777 Enzymatic Formula
- + Kills 99.99% of Harmful Germs and Bacteria
- + Kills Coronavirus (COVID-19) (Scientifically proven)
- + TGA Approved & Certified
- + Alcohol Free
- + Unique Non-Flammable Aerosol
- + Broad-Spectrum Sanitizer
- + Neutralizes Chemical Agents
- + Neutralizes Odors on a Molecular Level
- + Inhibits the growth of Mold & Mildew
- + Safe on Commercial, Industrial & Household Surfaces
- + Non-Toxic & Environmentally Friendly
- + Safe to use in All Interior Environments
- + Lasting Anti-Microbial Nano Barrier Surface Protection
- + 30 Days Surface Protection (Scientifically proven)
- + Easily Disinfects 'Hand to Reach' Areas
- + Won't Wash off during Routine Cleaning Procedures
- + Nut Free & Safe for Children & Pets
- + Disinfect Air Conditioning and Heating Units
- + Safe Import Vehicle Sanitation Solution
- + Non-Invasive Pleasant Aroma
- + Halal Certified Australia
- + Australian Made and owned

### CASSA Anti-Microbial SANITIZING & PROTECTANT FOGGER

CASSA 777 Formula - Room & Vehicle Disinfectant Foggers

Alcohol Free Hospital Grade Disinfectant

30 Days Surface Protection (Scientifically Proven)

CASSA Anti-Microbial Sanitizing Foggers safely and effectively Kill 99.99% of Harmful Germs, including Coronavirus (Scientifically Proven & TGA Approved).

These Alcohol-Free, Aerosol Foggers when actuated with a single press release a super fine disinfecting mist that is charged into your environment for 3-4 minutes terminating both airborne and surface contamination Killing Harmful Germs on contact and providing ongoing Surface Protection for up to 30 days (Scientifically Proven). They also eliminate odor causing bacteria and inhibit the growth of mold and mildew.

When our Advanced 777 Enzymatic Formula is misted onto any surface via our disinfecting foggers, including delicate surfaces such as fabric, glass, ceramic or metallic surfaces – it renders the surface 99.99% Resistant to Superbugs like MRSA, E.Coli and other Bacteria, Fungi and Viruses including Coronavirus (COVID-19). When CASSA's 777 Enzymatic Formula comes into contact with COVID-19 it targets, engulfs and absorbs the virus destroying its protein cell wall - killing it. The 777 Enzymatic Formula is a Hospital Grade Disinfectant that provides a Broad-Spectrum response to Hazardous Contamination. These Non-Toxic, Alcohol-Free Disinfecting Foggers have low corrosive qualities which means they will not damage surfaces and our 777 Formula is TGA Approved and Certified which ensures it is safe to use in all environments, including around children and pets.

CASSA Anti-Microbial 777 Enzymatic Formula is a one stop solution to ensure interiors are quickly and easily safe from contamination by rendering these dangerous microbes inert for up to 30 days. The 777 Anti-Microbial 30 Day Surface Protection will remain active on surfaces even with your regular cleaning routines (Scientifically Proven) making them an ideal sanitizing solution for all interior environments.
